

# Environmental Policy

We are in a business with focus on environmental topics, such as material selection, manufacturing processes and packaging material as well as transportation.

We will strive for improvements and act to:

- Fulfill laws and regulations within our environmental permit
- Work for reduction or replacement of chemicals with negative environmental impact
- Separate and recycle packaging material, waste and consumables from production
- Minimize internal scrap and reduce use of material and chemicals
- Use material and surface finishes which fulfill laws and regulations
- When possible use transports with reduced environmental impact
- When possible purchase from suppliers with environmental certificate
