

## Regular production in Sweden and China

### We are here for you and our business continues as usual

Even if covid-19 affects the world and causes some uncertainty, MMAB have balance in production and deliveries from both China and Sweden.

Production in China is back on normal speed, even if the leadtime is a little bit longer than normal. Some delays of the shipments can be expected, as the forwarders have a busy time and lack of flights.

Our production in Malmo, Sweden continues as usual with a good order stock.

It is time to use our technical support for your development projects, as well as ordering prototypes and plan for volume production. We will assist you with the best possible solutions.

Our co-workers and customers has highest priority and we have taken the necessary precautions in order to minimize the risks. Those who can works from home office, we avoid travelling and have some restrictions for visits and follows the authorities recommendations.

## New drilling area with machines from Schmoll

### Our factory in Sweden recently got a new drilling department with updated machines

The factory update has entered an intensive phase the last week. A new drilling area was opened and three drilling machines from Schmoll Germany was installed. An engineer from Schmoll adjusted and calibrated the precision machines.

The drilling machines have laser control of the tools and an autoloading magazine from unmanned production. One of the machines is equipped with X-ray for precision registration of multilayer PCB.

The area is temperature controlled for machine cooling and a stable climate, as any temperature fluctuations affects the mechanics and materials within few  $\mu\text{m}$ . The new drilling area and the machines is a major improvement for our production in Malmo, Sweden.
