

50 years in the PCB-business!

MMAB celebrates 50 years during 2020

We are proud and happy that we have been in the PCB-business for 50 years and are still a stable supplier to the electronics industry with our own production in Malmo, Sweden. Despite tough global competition we have continuously invested in our own factory, being able to manufacture printed circuit boards with increased layers, reduced track and gap as well as smaller vias.

Covid-19 postponed our 50th anniversary this summer. However we are here for you as a supplier of all types of printed circuit boards and volumes.

Totally five drilling machines installed

Our factory installed additionally two drilling machines from Pluritec.

In previous Newsletter we wrote about the startup of three drilling machines from Schmolz. Recently we installed additionally two drilling machines from Pluritec. The machines have autoloaders for unmanned production and we develop the technology further for blind vias and cavities, which we already can deliver as prototypes.

The new drill area created an improved storage area and we will increase our laminate stock with additional inner layers, to provide quick turn of 6-8 layers as well as impedance.

Summertime and closing weeks

Summer holiday take place week 29-31 in Sweden

This year the MMAB factory in Malmo, Sweden close for summer holiday week 29-31. Our factory require annual maintenance and we ask you to plan for your orders in time. Our partners in China are open as usual and will deliver according to plan.
