## New CEO for MMAB Group

### Carl Lidén new CEO for MMAB Group

We would like to welcome Carl Lidén as new CEO to MMAB Group. Carl has extensive knowledge of the Electronics and Automotive market, with previous experience from PanLink AB, PartnerTech AB and Valeo Engine Cooling AB.

## PCB talk with us at TEC-exhibition in Lund, Sweden

September 27th it is once again electronics exhibition in Lund, Sweden. MMAB will be there with our own table at Medicon Village, Ideon. Meet us there, our experienced sales staff and new CEO Carl. Read more at [www.evertiq.com](http://www.evertiq.com)

## Gold thickness down to 0,04 $\mu\text{m}$ ?

There are discussions about decreased gold thickness. ENIG (Electroless Nickel Immersion Gold) or Immersion Gold, should have a Gold thickness of min. 0,05  $\mu\text{m}$  and Nickel thickness min. 3  $\mu\text{m}$ . In an amendment to IPC-4552 you can read that surfaces for soldering only, can have a Gold thickness of 0,04  $\mu\text{m}$ .

MMAB will however continue to specify 0,05  $\mu\text{m}$  Gold thickness. This is valid both for boards made in our Swedish factory as well as for trading boards, controlled by our own MMAB Quality Requirements.

More information about our products can be found at [www.mmab-pcb.com](http://www.mmab-pcb.com)
